

Difax: Fraud and deception

Hello, Difax we have some information that you might want to look at.

Your largest revenue income is selling security systems to companies containing for example cameras, alarms and locks. We have evidence proving that you are using these systems to break into a small number of their customers to force them to upgrade to a more expensive more "secure" system.

We have detailed conversations between several of your workers, both lower and upper management on how to plan and execute a break-in on several companies.

However, we are willing to not disclose this information if you to pay us 100 million sek in bitcoin. Here is our bitcoin address:

mw7W7iDHZNU8pjocsv2YqSW4PwiLrFo2LZ. You have 3 days to pay otherwise we will release this information.
